July 6, 2009

Dear Governor Schwarzenegger:

The three hundred signers of this letter write to you as members of the US National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine, and as professors at the University of California to express our deep concern about the latest round of proposed cuts to the UC budget. Current proposals being weighed by your office and the Legislature call for a 19% reduction from 2007-8 levels in state support for UC, producing an $800 million shortfall in the UC budget for the 2009-10 fiscal year. This will lead to increases in student fees, reductions in pay or furloughs for faculty and staff, and cuts in virtually all University services. These cuts will be devastating to every part of the University’s mission, but as scientists and engineers we are particularly concerned about their effects on the future of science and technology in California. While we recognize that our state faces an unprecedented financial crisis, the proposed cuts come on top of a decades-long trend of declining state support for the University of California. The situation has reached a breaking point.

Further cuts of the magnitude being contemplated in the latest round of budget proposals are likely to destroy UC’s status as the leading public university in the United States. This would undermine prospects for economic recovery and damage California’s competitiveness for decades.

Before making a decision in the heat of a crisis that will have negative consequences for decades to come, we ask that you consider the following:

- It is estimated that 85% of per capita economic growth in the United States is due to technological change\(^1\), and the University of California has been a leading driver of that change. Productivity growth produced by UC technological innovation is estimated at $5.2 billion from 2002-11, leading to more than 100,000 new jobs in California.\(^2\) For every dollar that California invested in research and development at UC in 2000-1, UC researchers brought in another $3.89 of private and federal research money.\(^3\)

- UC trains the highly skilled workforce that drives California’s economy: 85% of biotech firms\(^4\) and 57% of research and development-intensive communications

---

\(^3\) Ibid, pg. 7.

firms\textsuperscript{5} in California employ holders of advanced degrees from UC. The co-founders of Intel, Apple Computer, Sun Microsystems, and MySpace all hold undergraduate or graduate degrees from UC.

- In 1970, the fraction of the state of California’s general fund devoted to UC was 7\%.\textsuperscript{6} By 2008-9 it had declined to 3.2\%.\textsuperscript{7} Thus further cuts to UC would come from a portion of the state budget that has already declined by more than a factor of two in relative terms in past decades.

- Between 1990 and 2008, inflation-adjusted state support per UC student fell by 40\%. As a result, the total inflation-adjusted education expenditure per UC student (including student fees and contributions from UC General Funds) decreased by 19\%, while student costs rose by 138\%.\textsuperscript{8} Further cuts will hit disadvantaged and lower-middle-class students the hardest, since they rely on financial aid, outreach, gateway, and tutoring programs, all of which will be under extraordinary pressure. This will inexorably reduce services to the component of California’s population most in need of access to a distinguished public university.

- UC’s status as a leading research institution depends on its ability to attract and retain the best scholars, but faculty salaries were already 12\% below market as of 2006-7.\textsuperscript{9} The salary reductions resulting from the proposed budget cut would widen the gap to 19\%. UC will find it impossible to attract and retain leading faculty with a salary gap of this magnitude.

- The impact of salary cuts on young faculty, many of whom have mortgages that they are only barely able to pay now, is likely to be particularly devastating. If their salaries are cut and they are faced with the prospect of losing their homes, these future scientific leaders can and will move elsewhere. This will produce a huge brain drain from California.

- If this damage is done, it will not be easy to undo. Even if UC salaries and research support were to recover after the crisis passes, it would take years to replace the professors who leave, and many of the investments that have been made in research and teaching programs would be irrevocably lost. Even worse, worries about the stability of funding and the safety of jobs at UC would hinder efforts to recruit talented scholars and teachers for years or even decades to come.

\textsuperscript{6} Larry Hershman, 2005-06 Budget Presentation Regents meeting, November 2004.
For the past 40 years, California has been struggling to run a world-class university on ever-declining state support. In the face of the current crisis, the past strategy of incremental cuts at the margin will no longer be viable, and major changes will be set in motion. The actions of the Governor and the Legislature in coming weeks will be seen, both by the scientists currently employed by UC and by the young researchers who will consider moving here in the next decade, as a clear statement of whether the state of California intends to maintain a leading research university or not. If it does not, California must be prepared to accept the long-term loss of educational, economic, and technological benefits that UC produces. The forefront of innovation will move elsewhere. This is the prospect with which we are now faced.

In a time of crisis, our attention rightly focuses on using limited resources to meet the needs of the moment. However we must remember that the University of California represents our state’s investment in the future. When the crisis passes and we begin to repair the damage, our prospects for success will be determined by how well we protect that investment today.

Sincerely,

(Signatories are identified by their National Academy affiliation: National Academy of Engineering [NAE], National Academy of Sciences [NAS], or Institute of Medicine [IOM].)

Professor and Chair, Department of
Mechanical Engineering, UC
Berkeley

Joseph Polchinski (NAS)
Professor, Physics Department, UC
Santa Barbara
Permanent Member, Kavli Institute for
Theoretical Physics

Karl S. Pister (NAE)
Dean and Professor Emeritus, UC
Berkeley
Chancellor Emeritus, UC Santa Cruz

Mu-Ming Poo (NAS)
Paul Licht Distinguished Professor in
Biology, Department of
Molecular and Cell Biology, UC
Berkeley

P. Buford Price (NAS)
Professor, Graduate School, UC
Berkeley

Louis J. Ptáček (IOM)
Investigator, Howard Hughes Medical
Institute
Coleman Distinguished Professor of
Neurology
Director, Division of Neurogenetics, UC
San Francisco

Stanley B. Prusiner (IOM, NAS, Nobel
Laureate)
Professor, Department of Neurology
Director, Institute for Nondegenerative
Diseases, UC San Francisco
Peter H. Quail (NAS)  
Professor, Department of Plant and Microbial Biology  
Director of Research, Plant Gene Expression Center, UC Berkeley

Yahya Rahmat-Samii (NAE)  
Distinguished Professor, Northrup-Grumman Chair in Electromagnetics, Department of Electrical Engineering, UCLA

Alexander S. Raikhel (NAS)  
Distinguished Professor, Department of Entomology, UC Riverside

V. Ramanathan (NAS)  
Distinguished Professor of Climate and Atmospheric Sciences  
Victor C. Alderson Professor of Applied Ocean Sciences  
Chairman, Atmospheric Brown Clouds Project (UNEP sponsored)  
Director, Center for Clouds, Chemistry, and Climate, UC San Diego

Marina Ratner (NAS)  
Professor, Department of Mathematics, UC Berkeley

Ken Raymond (NAS)  
Professor, Department of Chemistry, UC Berkeley

Arthur L. Reingold (IOM)  
Professor and Division Head, School of Public Health, UC Berkeley

Paul L. Richards (NAS)  
Professor, Department of Physics, UC Berkeley

David L. Rimoin (IOM)  
Director, Medical Genetics Institute, Cedars-Sinai Medical Center  
Professor, Departments of Pediatrics, Medicine, and Human Genetics, David Geffen School of Medicine, UCLA

Jasper Rine (NAS)  
Professor, Department of Molecular and Cell Biology  
Director, Center for Computational Biology, UC Berkeley

Michael Rosenfeld (NAS)  
Professor, School of Medicine, UC San Diego

John Roth (NAS)  
Distinguished Professor, Department of Microbiology, UC Davis

Abraham M. Rudolph (IOM)  
Professor Emeritus, Department of Pediatrics, UC San Francisco

Donald G. Saari (NAS)  
Distinguished Professor, Departments of Economics and Mathematics  
Director, Institute for Mathematical Behavioral Sciences, UC Irvine

Jerome L. Sackman (NAE)  
Professor Emeritus, Department of Civil and Environmental Engineering, UC Berkeley

S. Shankar Sastry (NAE)  
Dean of Engineering  
Director, Richard C. Blum Center for Developing Economies  
Roy W. Carlson Professor of Engineering, UC Berkeley
Michael A. Savageau (IOM)
Distinguished Professor, Department of Biomedical Engineering, UC Davis

Robert F. Sawyer (NAE)
Class of 1935 Professor of Energy
Emeritus, Department of Mechanical Engineering, UC Berkeley

Randy Scheckman (NAS)
Professor, Department of Molecular and Cell Biology, UC Berkeley
Investigator, Howard Hughes Medical Institute
Editor-in-Chief, Proceedings of the NAS

Geert W. Schmid-Schoenbein (NAE)
Distinguished Professor
Bioengineer, Department of Bioengineering and Medicine, UC San Diego

Thomas W. Schoener (NAS)
Distinguished Professor, Department of Ecology and Evolution, UC Davis

Gerald Schubert (NAS)
Distinguished Professor of Geophysics and Planetary Physics,
Department of Earth and Space Sciences and Institute of Geophysics and Planetary Physics, UCLA

James A. Sethian (NAE)
Professor, Department of Mathematics
Director, Center for Pure and Applied Mathematics, UC Berkeley
Head, Mathematics Department, Lawrence Berkeley National Laboratory

Peter Shearer (NAS)
Professor, Scripps Institution of Oceanography, UC San Diego

Stephen M. Shortell (IOM)
Dean and Professor, School of Public Health
Blue Cross of California Distinguished Professor of Health Policy and Management, UC Berkeley

Paul H. Siegel (NAE)
Director, Center for Magnetic Recording Research
Professor, Department of Electrical and Computer Engineering, UC San Diego

S. Jonathan Singer (NAS)
University Professor Emeritus
Professor Emeritus of Biology, UC San Diego

R. Paul Singh (NAE)
Distinguished Professor of Food Engineering, Department of Biological and Agricultural Engineering, UC Davis
Editor-in-Chief, Journal of Food Engineering

Robert Sinsheimer (NAS)
Professor Emeritus of Biology, UC Santa Barbara
Chancellor Emeritus, UC Santa Cruz

William A. Sirignano (NAE)
Professor of Mechanical and Aerospace Engineering
Henry Samueli Endowed Chair in Engineering, UC Irvine

Pravin Varaiya (NAS)  
Professor, Department of Electrical Engineering and Computer Science, UC Berkeley

James W. Valentine (NAS)  
Professor Emeritus, Department of Integrative Biology, UC Berkeley

Joan Selverstone Valentine (NAS)  
Professor, Department of Chemistry and Biochemistry, UCLA

Ajit P. Varki (IOM)  
Distinguished Professor of Medicine and Cellular and Molecular Medicine  
Co-Director, Center for Academic Research and Training in Anthropogeny (CARTA)  
Co-Director, Glycobiology Research and Training Center  
Associate Dean for Physician-Scientist Training, UC San Diego

Alberto Sangiovanni Vincentelli (NAE)  
Edgar L. and Harold H. Buttner Chair, Department of Electrical Engineering and Computer Science, UC Berkeley

Paul A. Volberding (IOM)  
Professor and Vice Chair, Department of Medicine, UC San Francisco  
Co-Director, UCSF-GIVI Center for AIDS Research  
Chief, Medical Service, San Francisco Veterans Affairs Medical Center

Kenneth W. Wachter (NAS)  
Professor, Departments of Demography and Statistics, UC Berkeley

David B. Wake (NAS)  
Professor in the Graduate School in Integrative Biology  
Curator, Museum of Vertebrate Biology, UC Berkeley

Douglas C. Wallace (NAS)  
Donald Bren Professor of Molecular Medicine  
Director, Center for Molecular and Mitochondrial Medicine and Genetics (MAMMAG), UC Irvine

Peter Walter (NAS)  
Professor of Biochemistry, UC San Francisco  
Investigator, Howard Hughes Medical Institute

Diane W. Wara (IOM)  
Professor, Department of Pediatrics, UC San Francisco

James A. Wells (NAS)  
Professor and Chair, Department of Pharmaceutical Chemistry  
Professor, Department of Cellular and Molecular Pharmacology, UC San Francisco

Arthur Weiss (IOM)  
Ephraim P. Engleman Distinguished Professor  
Chief, Division of Rheumatology, Department of Medicine, UC San Francisco  
Howard Hughes Medical Investigator

Jonathan Weissman (NAS)  
Professor, Howard Hughes Medical Institute, UC San Francisco
John B. West (IOM)
Professor, Department of Medicine, UC San Diego

Oliver E. Williamson (NAS)
Professor of the Graduate School
Edgar F. Kaiser Professor Emeritus of Business, Economics and Law, Haas School of Business, UC Berkeley

Tim D. White (NAS)
Professor, Department of Integrative Biology
Director, HERC, UC Berkeley

Michael Witherell (NAS)
Professor, Department of Physics, UC Santa Barbara

Jack Keil Wolf (NAE)
Professor, Department of Electrical and Computer Engineering, UC San Diego

Stanford E. Woosley (NAS)
Professor, Department of Astronomy and Astrophysics, UC Santa Cruz

Eli Yablonovitch (NAE, NAS)
Professor, Department of Electrical Engineering and Computer Science, UC Berkeley

William W-G. Yeh (NAE)
Distinguished Professor, Department of Civil and Environmental Engineering, UCLA

Keith R. Yamamoto (NAS, IOM)
Professor, Department of Cellular and Molecular Pharmacology
Executive Vice Dean, School of Medicine, UC San Francisco

T. Yilma (NAS)
Distinguished Professor of Virology
Director, International Lab of Molecular Biology, UC Davis

Patricia Zambryski (NAS)
Professor, Department of Plant and Microbial Biology, UC Berkeley

S. Lawrence Zipursky (NAS)
Professor, Department of Biological Chemistry, UCLA
Investigator, Howard Hughes Medical Institute

Bruno Zumino (NAS)
Professor, Department of Physics, UC Berkeley
